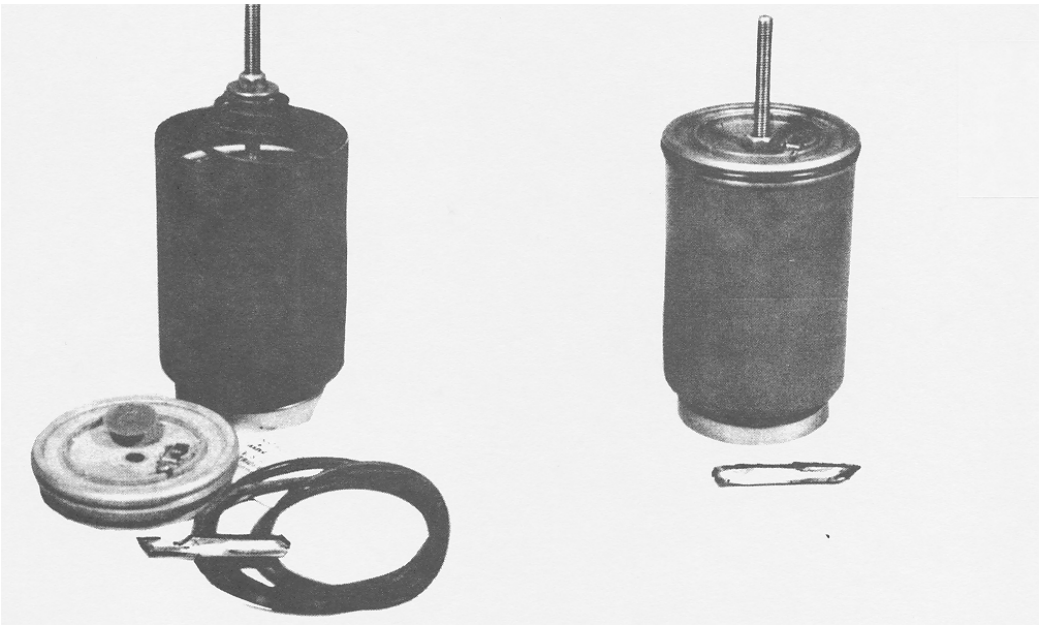
Subject: **Remanufactured Exchange AD-2 Air Dryer Desiccant Cartridge Piece #101900 (core class 13)**

You now have an answer to reduced maintenance costs for the AD-2 Air Dryer. As announced earlier this year, we now have available a remanufactured cartridge kit piece number 101900. This kit includes the desiccant cartridge complete, the end cover o-ring, lube tube and instruction sheet.



The remanufactured kit eliminates the time and cost involved in removal and rebuilding of the desiccant cartridge as well as savings to your fleet customers of 24% over the service part cartridge (piece number 287313).

The best part is we have them in stock! Now is the time to take advantage of this program and increase sales of both AD-2 air dryers and RX cartridge kits.
